SUMMARY

Full-stack Software Engineer with 1.5+ years architecting and owning production systems for a logistics platform. **Designed scalable, secure backend and frontend architecture**, and owned **payment infrastructure, billing automation, and customer-facing platforms** across **Node.js, Next.js, TypeScript, PostgreSQL, and Laravel**. Product-minded engineer who cares about **clean UI and intuitive user experience**; experienced coordinating delivery across engineering and ops teams, optimizing databases, hardening security, and driving B2B/B2C growth through technical SEO and PPC.

EXPERIENCE

Software Engineer (SDE-1) | Store My Goods

Jan 2025 – Present

- Owned the **end-to-end payment lifecycle** — integrated **PayU** for B2C and B2B flows, built invoicing and reconciliation, and resolved critical gateway failures in production with webhook idempotency and retry handling.
- Integrated **Zoho Books and Zoho CRM** with the platform — automated invoice sync, payment reconciliation, and customer record flows — eliminating manual finance work and unifying billing across systems.
- Launched the **customer portal** (customer.storemygoods.com) from scratch — a self-service platform for B2C and B2B customers to manage orders, payments, and inventory, owning architecture through deployment.
- Led the migration to storemygoods.com with zero-downtime cutover, SEO redirect mapping, and security hardening; resolved **critical security vulnerabilities** through audits and auth refactoring.
- Architected **3 new repositories on a modern, scalable stack** (storemygoods.com + customer portal) — modular service design, caching, **database optimization**, and **automated E2E testing with Playwright** covering UI flows and business logic — improving response times and release reliability.
- Maintain **6 legacy repositories** and a **role-based admin portal (RBAC)**, balancing new feature delivery with stability while coordinating across engineering and operations teams.
- Own **technical SEO and PPC** — site performance, structured data, and paid campaigns — driving organic and paid customer acquisition for the platform.

Associate Software Engineer | Store My Goods

May 2024 – Dec 2024

- Engineered a **monthly invoicing system** handling 200+ pricing variables across storage, logistics, and packaging with day/week granularity; **cut invoice generation time 30% and reduced billing errors 15%**.
- Designed a **QR-based warehouse inventory system** with batch QR generation, async job queues, tracking dashboard, and printable labels; **cut manual labor 40% and reached 99% inventory accuracy**.
- Shipped a **digital signature & PDF acknowledgment module** with cross-auth handoff between customer and ops portals, reducing paperwork 60%; automated self-drop console flow, cutting manual intervention 50%.
- Built **CRM churn tracking** and the **Buddy fleet app** — a real-time warehouse module with live CRM sync, packed-unit logging, and QR scan tracking, designed with a clean, intuitive UI for fast field use; reduced operational errors 25%.

PROJECTS

Engineering Blog & Portfolio — rahulmaurya.vercel.app | Next.js, MDX, TypeScript

- Built a Next.js + MDX blog with image optimization and a **Lighthouse score of 97+**; authored 8+ deep-dives on React performance, bundle-size optimization, and web security.

AI / LLM Side Projects — Self-driven exploration

- Building with **OpenAI and Claude APIs** in Node.js/Next.js, plus **RAG pipelines (embeddings, pgvector)** and prompt engineering patterns.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, SQL, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS, MDX, UI/UX Engineering, Responsive Design

Backend: Node.js, Laravel, REST APIs, GraphQL, Queues, Webhooks

Databases: PostgreSQL, MySQL, MongoDB, Redis, pgvector, Query Optimization

Testing & DevOps: Playwright, E2E & Automation Testing, Docker, AWS, Nginx, GitHub Actions, CI/CD

Integrations: PayU, Zoho Books, Zoho CRM, WhatsApp Business API, SMTP

Growth & Other: System Architecture, Scalability, Web Security, Technical SEO, PPC, AI/LLM (OpenAI, Claude, RAG)

EDUCATION

B.Tech in Computer Science & Engineering | Dr. A.P.J. Abdul Kalam Technical University | CGPA 7.5 | 2020 – 2024
